I felt I had to write to you and compliment you on your Thompson Mixer/Mincer 900E, and let you know how satisfied we are with this machine. After having it installed by you 3 months ago, and giving it a reasonable trial period, we are very impressed with it, and working out the number of man hours it will save, I believe it will have paid for itself in 2 years.

Only this morning I was operating this machine myself, and I timed 60lbs of mince in 30 seconds, which is some saving on manpower.

I am also impressed with it's excellent safety provision, and I am pleased I changed my mind from the 900 model, to a 900E model.

Wishing you continued success in selling these machines , and thanking you for the service provided by you over the years.

Yours sincerely

B W Graves
