Dear Ian

Just a short note to thank you for your excellent service. The Thompson mixer grinder which you were kind enough to demonstrate at our recent Q Guild meeting has become an indispensable "member of staff!", to describe it as a mere machine is to do it an injustice. It has revolutionised our sausage manufacturing without sacrificing any aspect of quality in the finished product, its mixing action is so gentle it as good as mixing by hand. In mincing mode it must blast the meat through at four times the speed of our previous Hobart 32 mincer. I would recommend one of these machines to anyone.

On the service front I would like to thank you for replacing our old broken down sausage filler the week before Christmas, on the same afternoon that it happened. Service like that is very difficult to find nowadays.

Regards

Harry Coates.
