Uncle Henry's butchery has purchased several pieces of equipment from J and N Food Equipment Ltd, including a vac-pac machine, a mixer-grinder and a bacon slicer.

With all our purchases, J and N took time to understand our requirements and supply the right piece of equipment that was cost-effective for the volumes and use we needed.

The after service has also been excellent – when something stops working, we need it up and running to keep the butchery going and normally there is a same-day repair service. That really makes a difference.
