

PATTY BURGERS

Semi industrial formers

Make large quantities of hamburgers quickly and hygienically!

The PINTRO hamburger forming machine makes it possible for 1 person to make up to 1000 hamburgers per hour! PINTRO hamburger former needs to be attached to a piston or vacuum filler or stuffer.

The PINTRO hamburger forming machine is suitable for big and small butcher shops, catering, etc.

When it comes to production speed, simplicity and hygiene, the Burger Enterprise is by far the most suitable solution for big and small butcher shops, restaurants, suppliers, catering firms, etc. to make patty burgers. There is no other hamburger forming system in existence that is as easy to use and that has the same capacity as the Burger Enterprise.

You can make hamburgers very swiftly with the PINTRO hamburger former. It is almost impossible to compare it to the manual production system simply because the difference is too big. With the Burger Enterprise, you can make hamburgers at least ten times faster than when you would make them manually. Even when you compare it to other ways of making hamburgers, the Burger Enterprise is still a better and faster alternative. You can count on a productivity increase with minimum 25%. The Burger Enterprise Hamburger forming machine is a must-have for every producer of hamburgers in the world.
